To make working with light as simple and easy as possible for photographers at every level. (We believe in the ease of TTL but also know that shooting manually is something we must incorporate.)

We wanted to ensure that as our customers grew their skills and advanced their hobby or career, that their gear would grow with them. That no matter how challenging the image they set out to create, that working with our gear would be anything but challenging. Than no matter how much other lighting gear they had or added, that our gear would work with it easily and intuitively. (We like to think that lighting is like a party: the more the merrier.) Playing well with others is something we learned as children and believe in to this day.

We also believe that if we could price/sell our gear as a great value, that it would be greatly valued by our customers and our end users.

We are proud to say that everything we set out to do has been accomplished. And will continue to be accomplished as we continue to innovate.

We knew that once everything worked together (with ease and compatibility) that anything would be possible for our users. And that when everything “goes”, anything goes.
All photographers are not created equal. While some embrace TTL, High Speed Sync and all the bells and whistles advanced technology offers there are many photographers that would rather shoot with manual flash. A camera, a trigger, a flash, a meter: Old school.

Phottix has spent a lot of time focused on being cutting-edge with the newest and most innovative technologies. We focused this innovative mindset on a powerful yet easy-to-use manual hot shoe flash. The result: The Phottix Juno.

Features:
- GN 58 Manual Hot Shoe Flash
- Adjustable over 8 stops, in 1/3 stop increments
- Zoom range 20-200mm
- Single Pin – Compatible with most major camera systems
- Built-in Phottix Ares II Transmitter and Receiver
- Fast control and adjustment
- HV Battery Port (Canon compatible)
- ¼” x20 Mounting Lug

The Juno, a single-point, manual flash, has all the functions and features you need to get the job done, whatever your camera system. The Juno is at home on your Canon, Nikon, Sony (MIS), Pentax, Panasonic, Fuji and Olympus camera. It offers a guide number of 58* and full to 1/128th, power adjustable in 1/3 stops. A command dial makes power changes fast and easy.

**Built-in Transceiver Triggering**
Built into the Juno is all the power and cutting-edge technology of the recently released Phottix Ares II Flash Trigger. Set the up the Phottix Juno on-camera in Transmitter Mode to trigger other nearby Juno flashes or compatible Phottix flash trigger receivers. Set Phottix Juno flashes in Receiver mode and trigger them with another Juno flash or an Ares II Trigger. This Transceiver function brings with it all the latest and greatest Phottix technology – 2.4 GHz, 100m+ range sporting 16 channels, four groups and Phottix’s Digital ID function.

**Ports Galore**
The Juno offers a host of enhancements you wouldn’t expect on a budget-price flash. The body features a ¼” mounting lug – to mount the Juno horizontally, as well as a Canon-compatible HV power port for external AA battery packs.

**Compatibility**
The Phottix Juno is compatible* with the Ares II and Strato II systems and can be used a Transmitter or Receiver* with both. The Juno is also compatible with the Sekonic L-478DR-PX meter.

* SKU: 80363 Phottix Juno Transceiver Flash
* SKU: 80364 Phottix Juno “Ready to Go” Kit
* SKU: 80365 Phottix Juno Ares II Combo
* SKU: 80366 Phottix Juno Ares II Double Pack
Welcome to the family
Phottix’s budget-friendly flash trigger system – the Phottix Ares II. The transmitter and receiver system boasts the latest technology and is perfect for manual shooting with studio lights or hot shoe flashes.

The Phottix Ares II will join the Phottix ecosystem and be compatible with other Phottix products.

Features:
- Transmitter and Receiver with LCD display
- 16 Channels
- (Strato II compatibility on channels 1-4)
- 4 Groups, A-D
- Digital ID Codes
- (0000 – 9999 compatibility on channels 5-16)
- 150m Range
- Compatible with other Phottix products*

More Channels and Digital ID:
Pick from 16 channels. The first four channels offer compatible with the Phottix Strato II Receiver – and can be used to trigger Phottix products such as the Mitros+ and Indra series of studio lights with built-in Strato II receivers. Use the Digital ID function for the ultimate in secure triggering - no one can trigger your flashes unless using your four-digit Digital ID code.

Universal Hot Shoe
The Ares II Transmitters and Receivers have been designed to be compatible with most major camera and flash systems (including Sony). The Ares II is at home on Canon, Nikon, Sony (MIS), Pentax, Panasonic, Fuji and Olympus cameras and compatible with most hot shoe flashes (triggering from the X-Sync pin).

Phottix Juno Compatibility
The Phottix Ares II will be compatible with the forthcoming Phottix Juno hot shoe flash. Juno units will feature a built-in Ares II compatible transmitter and receiver.

Sekonic Compatibility:
The Ares II is compatible with current and planned Sekonic meters, making the Ares II the perfect choice for manual shooters.
The Phottix Odin II TTL Flash Trigger is cutting-edge technology, functionality and features make Phottix’s flagship flash trigger the best in the world. The Odin II UI and control systems even faster and easier, based on input from photographers around the world.

- 5 groups A, B, C, D, E
- 32 channels - User Programmable Digital ID on its own line
- Group buttons and control dial for fast changes
- TTL Power Control +/- 3EV
- Manual Power Control 1/1 to 1/128
- High Speed Sync*
- Second Curtain Sync (Nikon, Sony only)

Features

- AF Assist Light
- Modeling Light Control with Indra500/360
- 2.4 GHz, Range 100m (332ft)
- Compatible with Indra500/360 TTL, Mitros+, Odin, Strato, Strato II, Atlas II
- Firmware upgradable

* on compatible cameras

The Phottix Mitros is a powerful and durable hot shoe flash that has seen continued popularity since its release. It combines incredible functionality, allowing photographers to not only use the Mitros+ on or off camera, but to also control and trigger remote flashes by radio signal.

Use the Mitros+ on-camera as a key or fill light, and to control and trigger other Mitros+ flashes or compatible flashes using Phottix Flash Triggers. The Mitros+ offers a built-in Phottix Odin II Receiver and Strato II Receiver. Existing Phottix triggers, like the Phottix Odin II or Strato II can be used to trigger the Mitros+ without extra receivers.

The “Go To” Flash for International Wedding and Event Photographers.

+ Built-in Strato II Receiver
+ Memory Functions
+ Built-in Odin II Receiver
The 500 Watt TTL Studio Light featuring High Speed Sync continues as the “go-to” location and studio light for many photographers. Under the hood is the ultimate in control – with the Phottix Odin II TTL Flash Trigger for Canon, Nikon and Sony built-in. The Indra500 TTL is the perfect way to unleash creativity. Use TTL to shoot during fast moving events like weddings. Shoot on-location, under the harsh sun and control ambient light with high speed sync. The built-in Phottix Odin II Receiver for Canon, Nikon and Sony makes the Indra500 TTL easy to control and trigger.

The Indra500 TTL offers 8 stops of power adjustment – from full power to 1/128 – perfect for overcoming midday sun or adding just a hint of light when shooting with large apertures. TTL exposures can be adjusted in +/- 3 EV levels.*

Using the Indra Battery Pack provides recharge times of 3.5 seconds and 360 full-power flashes (High-Speed Mode) when fully charged. It’s small but extremely powerful.

The Indra500 is a lot of power and control packed into a compact studio light. The Battery Pack (with compatible cables) can also power many native hot shoe flash brands.

Like all Phottix products – the Indra500 TTL was designed with the input of professional photographers around the world.

* On compatible cameras, when used with the Phottix Odin, Odin II or Mitros+ systems.

INDRA 500 LC
Studio Light

100m Range
15 Channels
5 Groups

Anytime Goes
Phottix presents the first studio light system compatible with Canon’s radio flash system. Incorporates the radio control and triggering the Canon RT and the Phottix Laso triggering systems.

The Indra500LC gives photographers 500W/s of TTL power, opening up new possibilities and allowing photographers to shoot in shutter and aperture priority modes with incredible power.

Features:
• Wireless Flash Shooting
• Compatible with multiple wireless radio transmitting devices, including Phottix Laso Transmitter, Canon ST-E3-RT flash transmitter, and radio-enabled Canon flashes.

Built-in Triggering
The Phottix Indra500LC TTL has the power and control of the Canon RT and Phottix Laso triggering systems built-in. Switch between TTL and Manual modes, adjust EV and manual power levels and use high speed sync, all from the Canon ST-E3, compatible Canon RT Speedlites and the Phottix Laso Transmitter - no extra hardware is needed.

Supports older Canon non-RT flashes
One of the best things of the Phottix Laso Triggering system is it’s ability to incorporate older non-radio Canon flashes into your workflow. There’s no need to set aside your 580 EXII – add a Phottix Laso Receiver and have the ability to control and trigger it, and add it your other Canon RT-enabled flashes - and the Phottix Indra500 LC.

High Speed Sync
With the Phottix Indra500LC TTL’s High Speed Sync function photographers can shoot at higher sync speeds* allowing wider apertures while still being able to control ambient light. In manual mode the Indra500LC offers 8 stops of power adjustments - from full power to 1/128 in 1/3rd stop increments. With Stroboscopic Mode, the Phottix Indra can be used for special effect and creative shooting with flash frequency of 1-100Hz and flash counts of 1-100 times.

Indra500 LC TTL Studio Light
SKU: 00336  Phottix Indra500LC TTL Studio Light and Battery Pack Kit (EU & UK)

SKU: 00339  Phottix Indra500LC TTL Studio Light and Battery Pack Kit (AU)

Laso TTL Flash Trigger
for Canon Only

Features:
• Support Multiple Flash Modes and shooting approaches including E-TTL II/E-TTL, Manual MULTI, Ext.A &Linked Shooting
• Controls and Triggers Canon-compatible radio-enabled flash

Laso Transmitter
The Phottix Laso Transmitter can control and trigger 5 groups (15 units) of Canon-compatible radio-enabled flashes. The Laso Transmitter can also control and trigger the Phottix Indra500LC Studio Light.

Laso Receiver
The Laso Receiver allows photographers to control and trigger older Canon flashes as well as studio lights, expanding possibilities - A much-improved lighting solution for Canon users.

Features:
• Wireless Flash Shooting
• Compatible with multiple wireless radio transmitting devices, including Phottix Laso Transmitter, Canon ST-E3-RT flash transmitter, and radio-enabled Canon flashes.

"Light is light, whether it be a flash or continuous light. This was shot using the Phottix Video LED light, colour temperature of the light was set at 3500K to mimic the colour of the sunset. Gorgeous soft light in such a small package."
The Phottix Strato II Multi 5-in-1 Wireless Trigger System gives photographers incredible control over their flashes and studio lights. Four channels and four groups are great in the studio or on location.

Features:
- 4 groups: A, B, C, D
- 4 Channels
- 150+ m range
- 1/250 sec sync speed*
- Flash wake-up functions*
- Hot shoe / PC Flash triggering
- Studio strobe triggering
- Wired and wireless shutter release functions
- Pass-through hot shoe on transmitter allows on camera flash to use TTL functions
- 2.4 GHz frequency
- Uses AAA batteries
- Compatible with Phottix Mitros+ TTL Transceiver Flash and Phottix Strato 4-in-1 Wireless Triggers

The Strato II Multi is a flash trigger and it can be used as a wired or wireless shutter release. The 2.4 GHz transmitter and receivers offer ranges of more than 150 meters and sync speeds of 1/250 second.*

Transmitters feature an innovative TTL pass-through hot shoe - allowing full TTL mode to be used with a camera-mounted flash. Receivers offer flash wake-up functions.* It’s fast, sexy, and powerful and has become an industry standard for wedding and event photographers.

Meet the Phottix Taimi Digital Timer – Phottix’s all-in-one digital timer and wired remote. The Taimi features a host of upgrades and includes everything needed* in one box.

Features:
- All-in-one digital timer
- Interval, long exposure and number of frames functions
- Wired shutter release functions including single and continuous shot modes with delay and bulb modes
- Interchangeable cables for popular Canon, Nikon and Sony cameras included
- Great for low-light and astro-photography

Many solutions, One box
The Phottix Taimi includes interchangeable shutter cables for popular Canon, Nikon and Sony camera systems – everything needed in one box - Perfect for photographers shooting with more than one camera system.

Timer functions include:
- Self-timer
- Interval timer
- Long-exposure timer
- Exposure count setting feature

Shutter Functions
The Phottix Taimi offers a number of new shutter release functions beyond its timer functions. It can operate as a wired shutter release with single and continuous shot modes with delay and bulb modes.

Cables included:
- N8 (Nikon 10-pin remote terminal)
- N10 (Nikon DC-2 cable)
- C6 (Canon E3 type)
- C8 (Canon N3 type)
- S8 (Sony Multi-terminal)

SKU: 18300 Phottix Taimi Timer Remote (all cables)

Take wireless triggering to the next level.
The Phottix Aion Wireless Timer and Shutter Release takes wireless triggering to the next level. The revolutionary wireless/wired timer and shutter release offers photographers an amazing number of triggering options, including auto-bracketing for HDR.

Cables for popular Canon, Nikon and Sony cables are included - making this system perfect for photographers that use more than one system.

What does the Phottix Aion offer?
- Timer and Long Exposure Functions
- Shutter Release Functions
- Wired or wireless operations
- 2.4 GHz frequency
- 60m range
- Backlit LCD

Technical Specs:
- Frequency: 2.4 GHz
- Range: 60m
- Time Functions: Self, long exposure, interval, number of frames
- Shutter Release Functions: Instant, continuous 5 shot, 2 second delay, or bulb modes

Cables included:
- N8 (Nikon 10-pin remote terminal)
- N10 (Nikon DC-2 cable)
- C6 (Canon E3 type)
- C8 (Canon N3 type)
- S8 (Sony Multi-terminal)

SKU: 16373 Phottix Aion Wireless Timer and Shutter Release (all cables)
Quick-Folding Softbox

Hail to the King

Softboxes are a must-have light shaper. Want to harness light, bend it to your will and make it your servant? Nothing is better than a softbox. They provide for countless looks and possibilities – making your photographic potential limitless.

Given our past successes we’ve upped the ante. Introducing the Phottix Raja Softbox series.

The Phottix Raja series features:

- Heavy-duty construction
- Uses Phottix’s Heat resistant SL Tech material
- Easy to assemble
- 5 sizes and styles
- Swapable speed rings for popular lighting brands
- Travel Bag included

Assembling most softboxes leads to anxiety, frustration and mumbled curses. Speed Rings, rods, and fabric result in you bending and twisting like an Olympic diver to get the box assembled.

Not with the new Phottix Raja – Hail to the King.

Why Deep?

Deep Octa Softboxes are loved by professional photographers – and for good reason: They produce a more directional light with greater contrast than traditional softboxes – with more even illumination. They are versatile – offering different looks by adding or subtracting the baffle and or diffuser.

Phottix Speed Ring Inserts for Raja Series:

SKU: 82584  Phottix Speed Ring Inner Ring For Elinchrom (144mm)
SKU: 82585  Phottix Speed Ring Inner Ring For Balcar (144mm)
SKU: 82588  Phottix Speed Ring Inner Ring For Profoto (144mm)

Assembling most softboxes leads to anxiety, frustration and mumbled curses. Speed Rings, rods, and fabric result in you bending and twisting like an Olympic diver to get the box assembled.

Not with the new Phottix Raja – Hail to the King.
The Premio Series feature innovative enhancements, making them both a durable and premium “go-to” lighting modifier.

The Premio series comes in shoot-through and reflective models with 85cm/33” and 120cm/47” sizes. The umbrellas feature heavy-duty construction, made with fiberglass spokes for cleaner catch-lights and enhanced durability - that will stand up to the rigors of on-location work as well as in the studio. The locking mechanism has been completely redesigned, making it stronger and easier-to-use.

White diffusers are available for the Phottix Premio Reflective models - easily turning them into a large softbox. A black, reflective backing is available for the shoot-through models – helping to better control light spill, as well as putting more light on target.

“Amazing !!”

Mark Rigsby - MDR Foto Art, Houston

“This is an amazing shoot-through you have made... This light diffusion is fantastic, it spreads the light well and the backing helps the fall-off as the light gets closer to the feet while retaining definition. This is not something I can do easily with my single beauty dishes set-up unless I up the power. Even then it’s not as even because it’s a more concentrated light source.”

Phottix Premio Parabolic Umbrellas Series
Phottix Spartan Beauty Dish (50cm and 70cm)

Compatible with Phottix Lighting or Mounting Systems

The perfect on-location light modifier, the Phottix Spartan Beauty Dish assembles easily using flexible rods, a huge benefit over the time-consuming setup of traditional octa softboxes. The white interior produces softer, more even light. Included in the kit are a metal beauty dish “disk”, baffle, front diffuser and fabric grid. The Phottix Spartan is more than just a beauty dish—it quickly transforms into a traditional octa softbox by replacing the metal diffuser with the internal baffle. Add the outer diffuser for even more softness and the grid to make the light directional. All with the speed and ease that will make Phottix Spartan your first choice in light modifiers.

Phottix Solas Softboxes

The Phottix Solas Series of softboxes – your perfect studio partners - light-weight and durable. Softboxes are a staple light modifier for many photographers, both in the studio and on location. After extensive research and feedback from our Pro Team photographers we developed the new Solas Series.

Constructed from a new material - SL-Tech – the Solas series are both light-weight and strong. With the standard fire and heat-resistant properties, SL-Tech fabric is both highly reflective to minimize light loss and durable enough to stand up to years of assembly and disassembly without warping or changing shape.

Speed Ring Mounts for Bowens, Elinchrom, Profoto, Multiblitz, Balcar, Hensel and Comet available separately.

The four Solas Series softbox models feature something for every photographer – An Octa box, a Rectangular box and two Strip boxes:

Compatible with the following Speed Rings (144mm, 16-Hole):
- For Bowens SKU: 82590
- For Elinchrom SKU: 82591
- For Balcar SKU: 82592
- For Profoto SKU: 82593
- For Multiblitz SKU: 82594
- For Hensel SKU: 82595

All Phottix Solas Softboxes come with an inner baffle, outer diffuser, mounting rods and grid. Speed Rings are available separately.
Easy Up HD
Umbrella Softboxes

Dramatic Portraits Just add Light

The Phottix Easy Up HD Umbrella Softbox series was made with portability in mind. Perfect for on-location shooting. It folds down like a regular umbrella but expands straight into a square softbox for instant use, saving time over traditional softboxes which require rods and speed rings for assembly. The recessed-front diffuser allows for more precise positioning and feathering of light.

Included is a removable grid to better control light spill in situations when accuracy is essential. A flash or studio light mounts backwards inside the softbox. Shooting towards the rear creates an even light which reduces any photo spoiling hot spots. The Phottix Easy Up HD Umbrella Softbox series can be collapsed and stored in seconds, easily transported or stored.

Equipment transportation is a big problem for travelling photographers. The new Phottix’s Padat200 Light Stand helps solve this problem - using a compact design and making for easy storage in checked baggage. Upon arrival, the Padat200’s flat design makes it easy to store in an equipment case or backpack.

The Phottix series of compact light stands have been a perennial favorite. Photographers continue to love light stands that are light-weight and pack-up small.

Enter the new Phottix Padat Compact Light Stand, the first in the new patents-pending Padat series. In Malay - Padat means study and reliable - and that just what the Phottix Padat is. Unlike previous Phottix compact stands - the Padat folds flat, making it easier to pack and take on location. It is 1/3 smaller - easier to fit in bags and cases.

**The Phottix Padat200 features:**
- Extends to 2m
- Packs Flat
- Great for location work
- Perfect for hot shoe flashes
- Carrying bag included

SKU: 88215 Phottix Padat Compact Light Stand (200cm/79”)
Saldo Series
Light Stands

The Phottix Saldo Series Light Stands - featuring a head-turning two-tone chrome and black look. The Saldo series offer the same great durability and affordability that have become Phottix trademark.

Varos Pro
Multi-Function Flash Shoe
Umbrella Holder

The Varos Pro series is 300% stronger than previous versions and features an aluminum alloy body with a metal cold shoe, 3/8” and 1/4” female threaded insert, male 3/8” and 1/4” crews included.

The teardrop-shaped umbrella mount accepts umbrellas with shafts 7-10mm and the 8 degrees slanted umbrella mount allows more light to hit the center of the umbrella. The patented umbrella clamp has been redesigned to offer 300% more locking force while keeping umbrella shafts more secure and damage free.

The Varos Pro Mini offers patented features and smaller footprint design. The aluminum alloy body with metal flash cold shoe is perfect on-location or in the studio.

Cerberus
Multi Mount Holder

The Phottix Cerberus System was designed to safely use hot shoe flashes with softboxes. Compatible with:
